

Coming to America

Who Should We Welcome, What Should We Do?

What are the Issues?

The immigration issue affects virtually every American, directly or indirectly, often in deeply personal ways. This guide is designed to help people deliberate together about how we should approach the issue. The three options presented here reflect different ways of understanding what is at stake and force us to think about what matters most to us when we face difficult problems that involve all of us and that do not have perfect solutions.

The issue raises a number of difficult questions, and there are no easy answers. The concerns that underlie this issue are not confined to party affiliation, nor are they captured by labels like “conservative” or “liberal.”

The research involved in developing the guide included interviews and conversations with Americans from all walks of life, as well as surveys of nonpartisan public-opinion research, subject-matter scans, and reviews of initial drafts by people with direct experience with the subject.
